| **AB 1** | WATCH | Apr 4, 2013 | **Water quality: integrated plan: Salinas Valley** | Appropriates $2,000,000 to the state water quality control board for use by the Greater Monterey County Regional Water Management Group to develop an integrated plan to address the drinking water and groundwater quality issues affecting communities in the Salinas Valley whose waters have been affected by waste discharges; 4/3 amendment allows any remaining money from the study to be used for executing the plan or running in-lote tests of plan components | 2/12 Our major concern is the possible impact on water rights. This bill is for a purely concerned with water quality and has a broad support base from environmental, farming and water supply organizations. So far, we find it beneficial, but we will continue to watch it. | Assembly Appropriations | Apr 10, 2013 | requires 2/3 vote to pass - in committee; 2/3 vote passed Assembly Environmental Safety and Toxic Materials committee, moved on to Appropriations; 4/3 amended; 4/4 hearing set | AB-1 |

| **AB 23** | SUPPORT | Apr 3, 2013 | **State responsibility areas: fire prevention fees** | repeal the SRA fire prevention fees | There were a large number of votes and and inequities on 2011's SRA fee legislation, including double-taxation of homeowners who pay both the SRA fee & the district. This bill repeals the fee. Our arguments against the fee include:* Fees are supposed to be paid for services received. No one to our knowledge has actually received a service for paying this "fee"<br><br>* The money collected is not being used to exclusively fund fire prevention activities.<br><br>* Many people who pay this "fee" reside in local fire districts, which provide all of their fire protection and fire prevention services<br><br>* Local districts provide mutual aid assistance to CalFIRE but do not receive any benefit from the fee for those services<br><br>* There are large districts that regularly receive mutual aid assistance from CalFIRE for large fire events like Los Angeles County that are NOT paying this fee. | Assembly Natural Resources | Apr 15, 2013 | in committee; 3/18 amended, 4/3 hearing set | AB-23 |

| **AB 153** | WATCH | Apr 3, 2013 | **California Global Warming Solutions Act of 2006: offsets** | This bill, if the state Air Resource board uses its authority to include the use of market-based compliance mechanisms, would require the state board, on or before January 1, 2014, to adopt a specified process for the review and consideration of new offset protocols and, commencing in 2014 and continuing annually thereafter, use this process to review and consider new offset protocols.<br><br>The bill would prohibit the commission, with exceptions, from filing as complete, or acting upon, an application for a coastal development permit for a project on property that is subject to an existing violation case for which a violation notification letter has been sent, or a cease and desist order, administrative order, or civil penalty has been issued or recorded until the violation has been resolved. The bill would authorize the commission to resolve any unresolved dispute between the executive director and an applicant regarding the implementation of the above provision at a noticed hearing. This bill would authorize the commission to issue a coastal development permit for a development permit for development on such a property if the violation is de minimis, as defined. This bill would prohibit the commission from taking action on the application until the de minimis violation has been resolved, as determined by the executive director. | Anything that combines the Coastal Commission and Mark Stone is automatically worrisome, starting to look benign | Assembly Appropriations | Apr 1, 2013 | 3/11 amended, 3/18 hearing date set; 4/2 passed Natural Resources | AB-153 |
