AB-904	SUPPORT	Aug 30, 201	Forestry: working forest management plan	currently discusses appeal procedures for NTMPs; 4/22 the text has been changed. This bill creates the Working Forest Management Plans, the tig acreage analog to NTMPs.	This bill is generally good but could use some reworking. NTMPs are untouched and the Southern Subdistrict can continue to use NTMPs. There is concern about the level of inspection. PLC offered another solution: when the RPF and LTO file their plan with the boilerplate, the one complaining should do a cruise to determine the correct stocking level. If the cruise shows the correct, CalFIRE inspects the function of the cruise costs. If CalFIRE is correct, the landowner pays cruise costs + 10%. CCFA believes this plan should also be the responsibility of the RPF. If the land is managed such that a new/ endangered species conceives the land, CalFIRE can't require that the land continue his business as usual, since what he is doing is correct for that species. So, CCFA submitted a list of improvements. AB-976	OPPOSE	Aug 29, 201	Coastal resources: California Coastal Act of 1976 enforcement: penalties	provides the option of penalties imposed by the California Coastal Commission directly as an alternate to penalties from the court. All monies collected go to the Coastal Commission. 4/25 amendment removes provision that fees go into Coastal Commission coffers. the red is wording clarifications, the blue is substantive changes. 5/13 - adds the assessed if violation is corrected within 90 days, see if correcting the violation does not require obtaining a coastal development permit, and considers the number of number of violations issued, number of violations resolved, number of penalties assessed and amount of penalties collected by the Commission in the previous five years. 5/31 - Dec 31, 2013. The bill remains on the 2013-2014 unless renewed., 8/26 - the latest amendment provides that penalties shall be assessed each day that the violation persists, but that the total may not exceed three times the amount of the sunset date now appears to be 2019. it also adds the provision that any penalty imposed before the sunset shall remain in place beyond the sunset date.	CCFA is concerned about penalties originating within the Coastal Commission because of the Coastal Commission's reputation as being arbitrary and obstructionist. In a recent Ag Alert article, the Farm Bureau notes that the Commission's penalty and cease and desist notation actions were viewed as "intensification of farming"; farmers were told that they needed to build permanent structures for the release of their livestock or perform other land maintenance operations. AB-1213	WATCH	Aug 13, 201	Bobcat protection act of 2013	places bobcats into protected status; the 4/25 amendment changes the entire flavor of the bill by requiring that the Fish and Game Commission work with Fish and Wildlife able to set harvest limits based on populations, and providing a licensing mechanism for the take of bobcats. 5/13 amendment adds the assessed if violation is corrected within 90 days, see if correcting the violation does not require obtaining a coastal development permit, and considers the number of number of violations issued, number of violations resolved, number of penalties assessed and amount of penalties collected by the Commission in the previous five years. 5/31 - Dec 31, 2013. The bill remains on the 2013-2014 unless renewed., 8/26 - the latest amendment provides that penalties shall be assessed each day that the violation persists, but that the total may not exceed three times the amount of the sunset date now appears to be 2019. it also adds the provision that any penalty imposed before the sunset shall remain in place beyond the sunset date.	The 5/24 amendment did not serve to clarify the bobcat protection parameters. Also, the bill is not necessary because CDFW already has the authority to establish seasons for bobcats, but it establishes, for the first time, bobcats, CCFA is neutral on the topic.
