AB-1	WATCH	Apr 25, 2017	Water quality: integrated plan: Salinas Valley	Appropriates $2,000,000 to the state water quality control board for use by the Greater Monterey County Regional Water Management Group to develop an integrated plan to address the drinking water and wastewater needs of disadvantaged communities in the Salinas Valley where those waters have been affected by waste discharges. AS amendment allows any appropriation to be made only after a need for executing the plan or running it into law(s) of plan concepts	2/12 Our major concern is the possible impact on water rights. This bill is for the purely concerned with water quality and not water rights. Water rights is a responsibility of the state water quality organizations. So far, we find it beneficial, but we will continue to watch it. AB-23	SUPPORT	May 24, 2017	State responsibility areas: fire prevention fees	repeal the SRA fire prevention fees	There were a large number of forest ends and inequities on 2011's SRA fee legislation, including double-taxation of some parcels and lack of benefit to the district. This legislation fixes the arguments against the fee in order. * Fees are reduced by 23% from what is received. No one is to pay homeowners has actually received a service for paying the fee. * The money collected is not being used to exclusively fund fire prevention activities. * Many people who pay this "fee" reside in areas that are not responsible for the their fire protection and fire prevention services * Local districts provide mutual aid assistance to CalFIRE but do not receive any revenue from the fee for those services * There are large districts that regularly receive mutual aid from districts in CalFIRE for large fires events but Los Angeles County that are NOT paying this fee. AB-153	WATCH	May 24, 2017	California Global Warming Solutions Act of 2006: offsets	This bill, if the state Air Resource board uses its authority to include the use of market-based compliance mechanisms, would require the state board to ensure that any offset credit or other specified process for the review and consideration of new offset protocols and, commencing in 2014 and every 3 years thereafter, the adoption of any amendment to existing offset protocols. Existing amendment prioritizes offset protocols: first priority to projects that provide direct environmental benefits or quality to heavily impacted communities; and health and environment benefits across the state	Anything that combines the Coastal Commission and the state legislature is automatically worrisome. The SGN recommends watching this bill to see what activities and carvings from this bill should include forestry activities, which is a welcome addition. AB-203	WATCH	Jan 19, 2017	Coastal resources: coastal development permits: penalties.	Existing law provides for the imposition, in specified circumstances, of a civil penalty, not to exceed $30,000, for a violation of the Coastal Act of 1976. This bill would increase the maximum penalty amount to $50,000. The bill would also authorize the imposition of a penalty in an amount that reflects any economic benefit or gain the violator derived from the violation	WCI desperately needs some sunshine in some its proceedings, but it currently depends on the public has no access to how the Commission makes decisions. The Cap-and-Trade scheme is being hatched. 4/24 According to the posted analysis, the Commission is in the process of proposing (non-meeting requirements on conference call meetings. AB 587 and AB 1613 are companion bills to create a Western Climate Initiative, Inc. to follow the Regino Keene sunshine law. AB-284	WATCH	May 24, 2017	Energy: Real to 2030 Board	forms board to track progress in greenhouse gas emissions reduction. The bill amendment requires hiring an independent research group to formulate recommendations to the board on how to achieve the metrics to impact. 4/25 amendment clarifies the members of the committee and the tasks of the committee.	The new amendment includes a couple of key concepts that we support. The first is to require public notice, which is there any one notice such, nor is there any requirement for public notice. The reductions in greenhouse gases may be the most effective way to reduce them is by setting up shop elsewhere, which we support. The second is to require that the board consider transportation costs of the product. AB-350	SUPPORT	Apr 28, 2017	Timber harvesting plans: exempt activities	The bill would increase the size of tree that may be removed within 500' of structure without a THP for fuel reduction purposes from 12" to 24" and increase the size of tree that may be removed from 24-36in to 36-48in. which is still bigger than the current 18-24in limit. The bill also required several re-authors	The bill waives the available options of people who are trying to affordably create forest health and fuel reduction projects. The bill also requires still more red tape for this exemption, but for those few who will, it greatly streamlines the process. The bill also requires negotiations to do the treating. A 36" DBH tree is a marketable size, and this bill would likely lead many offers to cut it for the stamps. SB-633	WATCH	Mar 30, 2017	CEQA: environmental impact reports	specifically requires "that the use of alternative fuels becomes available was not known and could not have been known by the lead agency at the time the notice was given at the time the EIR was certified as complete." 4/19 amendment adds that the lead agency must consider and put forth to include those that "consider the temporary uses of land and public gatherings that might become available but are not a significant effect on the environment"	makes it easier to require subsequent or supplemental EIRs when new technical information is presented. The "minor temporary use" could include anything from a farmer's market to a rave & a have-a-beer-impact-fest previous entries into the property	Senate Natural Resources and Water		read first time 2/21/13, 3/11 amended: hearing set: 4/9 amended: hearing set: 5/7 amended, passed Natural Resources and Water: 5/29 amended, passed Senate: 6/3 hearing set: 6/11 assembly: 6/14 assigned to Natural Resources and Water, hearing set:
SB-674	WATCH	Jan 13, 2017	California Environmental Quality Act: exemption: sustainable communities strategy	makes changes to CEQA to help along "smart infill" projects and to create standards for many categories of projects. Creates a Strategic Growth Council a $30 million annual fund for grants for creating sustainable communities; 5/7 amendment requires that projects that are exempt from certain requirements pay a fee to a regional entity in the Annual Budget Act for grants from so fund instead of the Strategic Growth Council Fund and Natural Heritage Technology Fund	don't care much about the "smart infill" portion, but the standards are badly needed. Many of the sections n through t of the proposed law	Senate Natural Resources and Water		read first time 2/21/13, 3/11 amended: hearing set: 4/9 amended: hearing set: 5/7 amended, passed Natural Resources and Water: 5/29 amended, passed Senate: 6/3 hearing set: 6/11 assembly: 6/14 assigned to Natural Resources and Water, hearing set:

SB-754	OPPOSE	May 5, 2017	California Environmental Quality Act	various massages to preparing and filing EIRs.	there is a very dangerous provision that would allow CEQA to be used to enforce mitigation measures on a project. This gives the Sierra Club a free hand to sue projects that they don't like. Another harmful provision states that "Any person who has not filed within 7 years prior to the notice of preparation of an environmental impact report for the project may not bring an action or proceeding to challenge the lead agency's action with respect to the environmental impact report." This is a 10 year harvest rental cycle such as is common in timber harvesting in the Sierra Nevada. It also does not allow the project applicant or his consultant to "contract with" the preparation of the environmental impact report. SB-767	WATCH	May 2, 2017	Environmental quality: the California Environmental Protection Act	4/18 amendment adds intent language recognizing the need to reform CEQA, requires a report to the legislature by 2019 on CEQA and adding protection to projects that meet local zoning and planning criteria and follow existing legal standards	Adjustments to CEQA - not sure what it does. Appears to be a placeholder bill for moving in the right direction. Hope to attempt to stop frivolous harassment suits using CEQA	Senate Natural Resources and Water		read first time 2/21/13, 3/11 amended: hearing set: 4/9 passed Environmental Quality and Judicial, 4/2 set hearing, amended, passed Natural Resources and Water, referred to Senate Rules, 4/11 hearing set: 4/16 amended: hearing set: 4/23 passed Senate Judiciary, 4/28 analysis posted: hearing 5/1 failed, passage in committee: reconsideration granted: 5/5 committee recommendation granted
